# Wholesale Nursery

# Since 1993, Workpower's Wholesale Nursery has been a leading supplier of high-quality green stock in Western Australia.

We propagate and grow more than 1.2 million plants each year, specialising in WA natives found on the Swan Coastal Plain.

## What we grow

We grow over 300 types of native Australian plants, including:

- WA native tube stock
- Rushes and sedges
- Local providence propagated plants
- Commercial landscaping plants

Our plants are available in 63cell trays through to 14cm pots

## Our services

We offer our customers a holistic service that can include:

- Contract growing to meet your project specifications
- Propagation, using your seed or professionally collected and stored seed
- Cuttings and Tissue-culture
- Delivery and quarantine

## Installation and maintenance by Workpower

If you require installation for your project, our Environmental Services team can help you. Phone (08) 9375 4950 or email [environmental@workpower.asn.au](mailto:environmental@workpower.asn.au)

For plant maintenance services, please get in touch with our Property Services team. Phone (08) 9375 4930 or email [propertycare@workpower.asn.au](mailto:propertycare@workpower.asn.au)

## Quality is our priority

Our Wholesale Nursery and practices are accredited through the Nursery Industry Accreditation Scheme Australia (NIASA), and we follow best-practice recommendations from Nursery and Garden Industry Western Australia (NGIWA)

We practice a minimum use of pesticide approach and use integrated pest management strategies to ensure our propagated plants meet our high-quality standards.

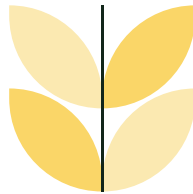

## Working with us

Working with us is easy. Once you have chosen your species, quantity, sizes and delivery date, contact our Sales and Contracts Coordinator for a written quote.

Email: [plants@workpower.asn.au](mailto:plants@workpower.asn.au)

### Ordering

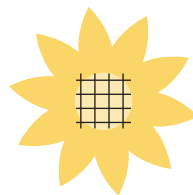

Forward orders should be placed in late September as the growing time to achieve optimum quality is between six to nine months, depending on the species.

### Landscaping plants

Landscaping forward orders and contract growing require a three to five-month lead time to supply our 140mm range.

We maintain an extra stock of landscaping plants throughout the year. Please get in touch with us for a monthly plant availability list.

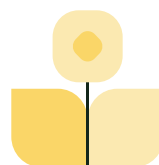

### Reporting growing progress

We provide a progress report of your order up to your scheduled dispatch date.

### Delivery

We can deliver your plants to you, and recommend booking your delivery one week in advance to avoid any delays.

### Last minute projects

Send us your request, and we will do our best to help.
